Privacy Policy

Ketonix Companion does not collect any personal data. Everything you enter or measure is saved only on your own device.

This policy covers the Ketonix Companion app for iPhone, iPad and Android, and its web version at www.ketonix.com/app/companion.

Policy summary

Personal data is not collected.

- No account and no sign-in.
- No analytics, no advertising and no tracking.
- Nothing is sent to us or to anyone else, unless you choose to share it yourself.

Full policy

Data stored on your device

What you enter or measure is saved only in the app on your device. In the web version it is saved in your browser on that device. Examples: breath acetone readings from your Ketonix, blood ketones (BHB), blood glucose, weight and waist, meals and their nutrients, foods and meals of your own, exercise, sleep, stress, alcohol, notes, experiments, diet targets and profile names.

No name, address, email address or ID number is needed for the app to work. Everything you enter is voluntary.

Your Ketonix

The app connects to your Ketonix breath analyzer by Bluetooth (and by USB in the web version on a computer) to read your measurements. The connection goes directly between your device and your Ketonix, and the readings are not sent anywhere else. The app uses Bluetooth only for this.

Sharing that you choose

The app only shares data when you tap a button to do so, and only with the place you choose:

- **Backups and exports.** You can save a backup file or a spreadsheet (CSV) file, for example to iCloud Drive, Google Drive or an email to yourself. You decide where the file goes, and that service's privacy terms apply to it.
- **Ask AI.** You can share a question and your data for a period you choose with an AI app you choose, such as ChatGPT, Claude or Gemini, or copy it as text. The app shows you the exact text first. The AI app's privacy terms apply to what you share.

Crash reports

If you have allowed your phone to share analytics with app developers, Apple or Google may send us anonymous crash reports. You can turn this off in your phone's settings. These reports do not contain your readings or entries.

Mode and place of processing the data

Methods of processing

All processing, such as charts, trends and diet calculations, happens in the app on your device.

Place

Your data is saved on the device where the app is installed. It is not stored or processed anywhere else.

The web version

When you open the web version, your browser downloads the app from www.ketonix.com. Like any website, the web server handles technical information such as your IP address to deliver the files. Your readings and entries are never sent to it.

Links

The app has links to other websites, for example the Ketonix shop. They open in your browser, and those websites' own privacy policies apply.

Retention and deletion

Your data stays on your device until you delete it. You can delete single entries, delete all data under More, Your data, delete a profile, or remove the app. In the web version, clearing the website data in your browser removes it. Backup files you have saved stay where you saved them until you delete them.

Changes to this policy

If this policy changes, the new version is published with a new date.
